

WASTEVEST TECHNOLOGIES LIMITED

2025/2026 ANNUAL IMPACT REPORT

Accelerating Climate Action Through Circular Innovation

This report highlights WasteVest Technologies Limited's activities, partnerships, milestones, and organisational development between 2025 and 2026. It reflects our commitment to building practical climate solutions through education, circular economy innovation, and community engagement.

A Message from the Founder

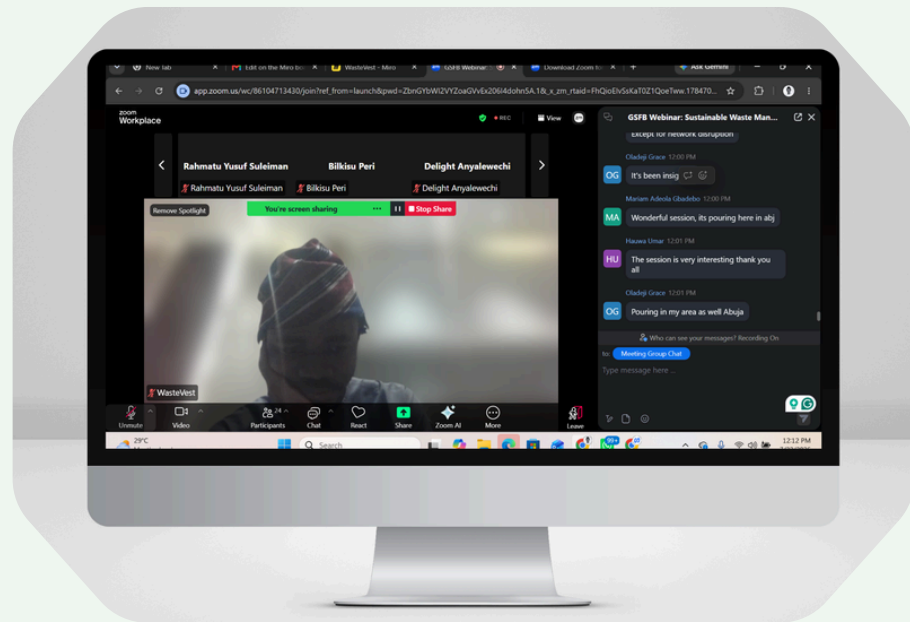

Dear Partners, Supporters, and Friends,

The past year has been one of learning, growth, and laying strong foundations. Although WasteVest is still in its early stages, we have remained focused on our mission of empowering people to take climate action while promoting sustainable waste management through innovation and education.

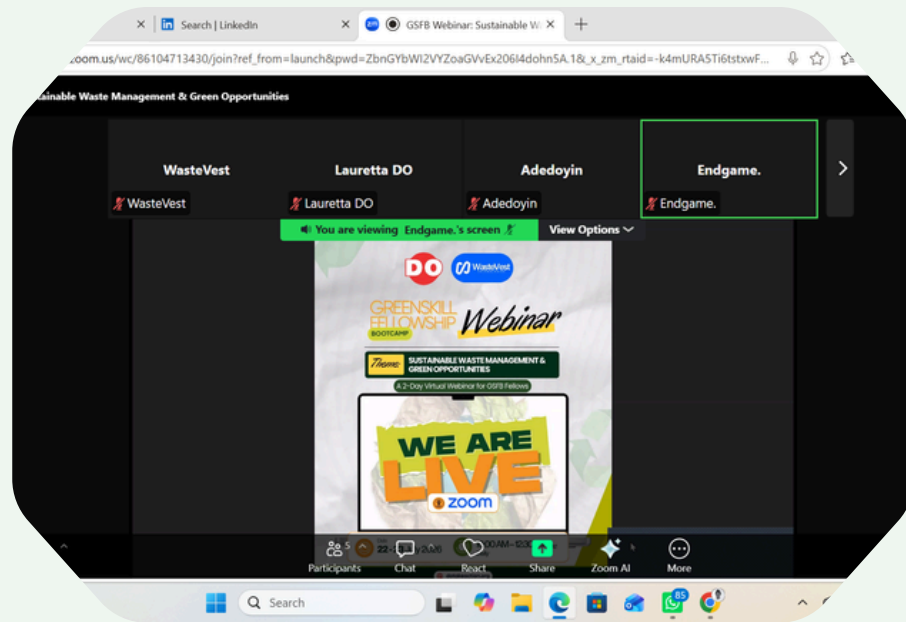

One of our proudest milestones this year was becoming an Accredited Carbon Literacy Training Organisation through The Carbon Literacy Project, enabling us to deliver internationally recognised climate education in Nigeria. This achievement reinforces our belief that climate action begins with informed people.

We also strengthened our organisational capacity through programmes delivered by the Lagos Business School Sustainability Centre, LEAP Africa, ACT Foundation, and the Nigeria Youth Futures Fund. These experiences have improved our leadership, governance, and ability to design impactful community programme

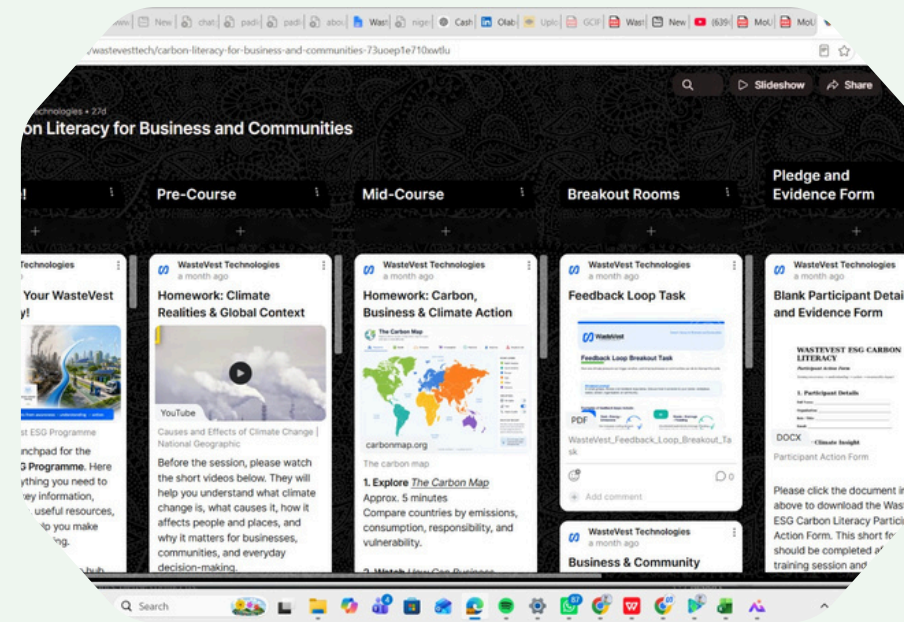

Proven Track Record

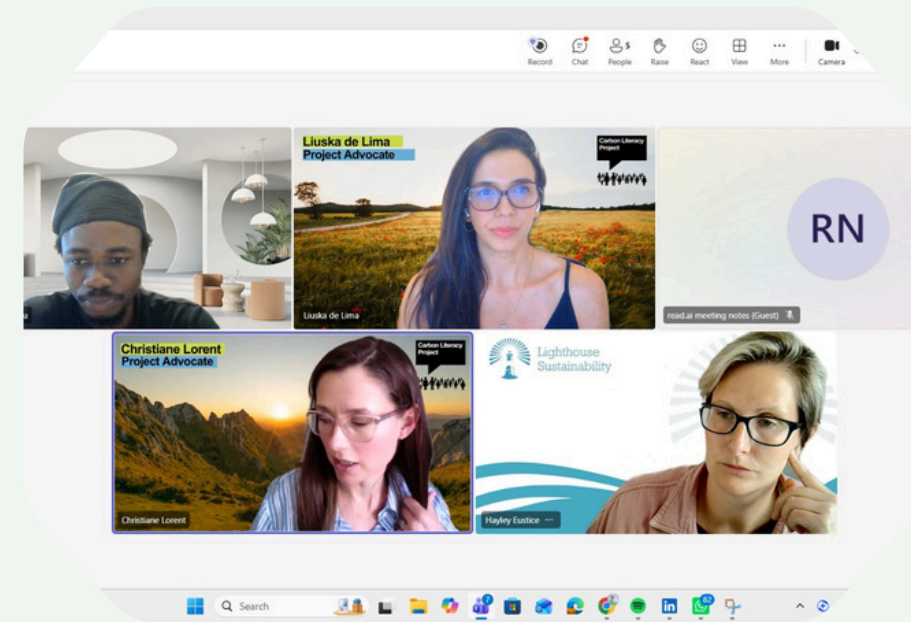

Our work has expanded beyond recycling. Today, WasteVest serves as a platform for climate education, youth engagement, circular economy innovation, and partnership development.

Our work has expanded beyond recycling. Today, WasteVest serves as a platform for climate education, youth engagement, circular economy innovation, and partnership development.

As we look ahead, our priority remains clear: empowering more people with practical climate knowledge while building technology and partnerships that make sustainable waste management more accessible across Nigeria.

Groundbreakers

Thank you to every partner, volunteer, mentor, and supporter who has believed in this vision. Together, we are building a cleaner, more resilient future.

Olabode Afurewaju
Founder & Managing Director

Who We Are

WasteVest Technologies Limited is a Nigerian climate and circular economy enterprise working to reduce plastic pollution, promote climate literacy, and strengthen sustainable

waste management through education, technology, and community partnerships.
We believe that solving environmental challenges requires informed people, innovative systems, and collaborative action.

Our Vision

A future where every community actively contributes to a circular economy and a climate-resilient society.

Our Mission

To empower individuals and organisations with practical climate knowledge while developing

innovative solutions that transform waste into value and strengthen sustainable communities.

Our Focus Areas

Climate Literacy

Delivering internationally recognised Carbon Literacy training that empowers individuals and organisations to reduce emissions and take meaningful climate action.

Circular Economy

Promoting recycling, waste segregation, and resource recovery through education and innovation.

Sustainable Waste Management

Supporting responsible waste collection and encouraging better environmental practices within communities.

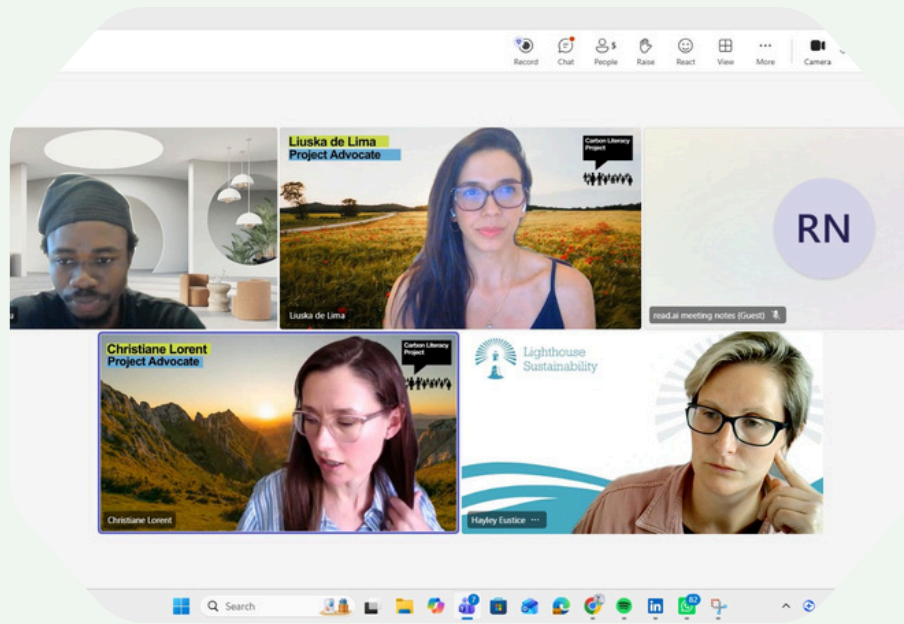

Community Engagement

Working with schools, youth groups, businesses, and community organisations to promote environmental awareness and action.

Green Innovation

Developing technology-enabled solutions that improve waste collection, recycling systems, and environmental data.

Highlights from the Year

Accredited Carbon Literacy Course

WasteVest became an accredited Carbon Literacy Training Organisation through The Carbon Literacy Project, allowing us to deliver globally recognised climate education tailored to the African context.

Building Organisational Capacity

Throughout the year, the organisation strengthened its operational and leadership capacity through participation in programmes supported by:

- ACT Foundation
- Lagos Business School Sustainability Centre
- LEAP Africa
- Nigeria Youth Futures Fund

Climate Education

WasteVest organised and supported climate awareness initiatives that engaged young people, professionals, and community members in conversations around:

- Climate change
- Carbon emissions
- Circular economy
- Responsible consumption
- Sustainable waste management

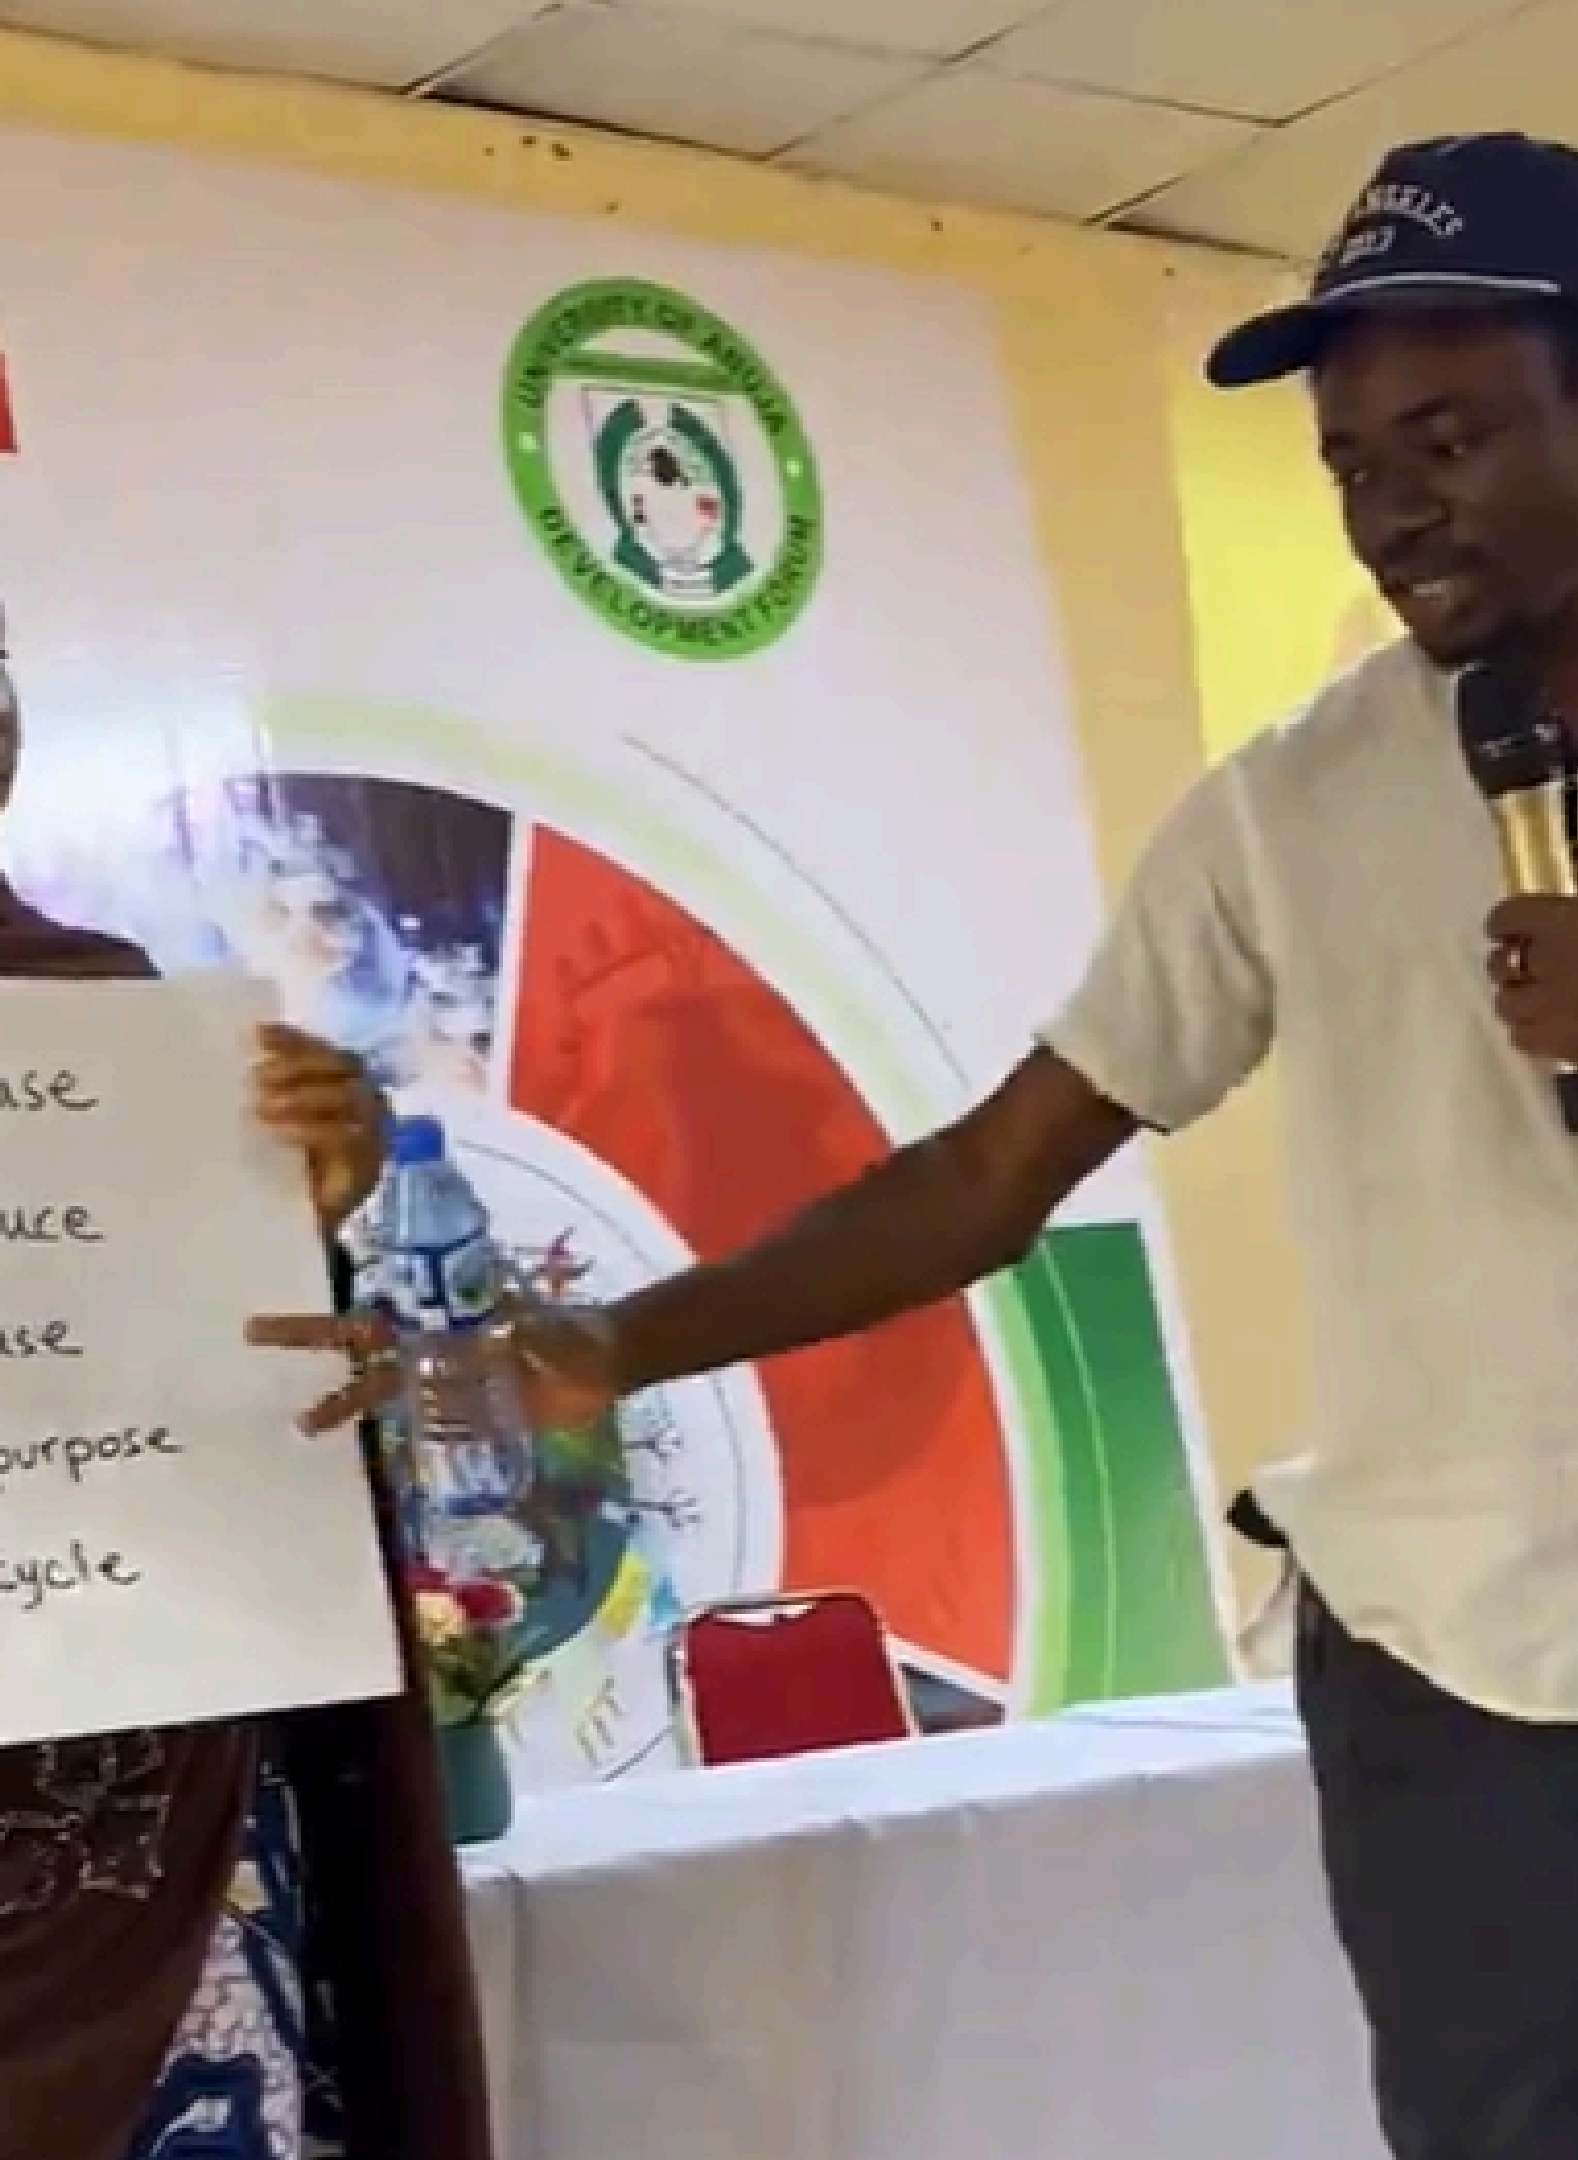

Partnership Development

We continued building relationships with organisations working across sustainability, innovation, and youth development to expand the reach of our programmes.

Key partnerships include:

- Lighthouse Sustainability
- The Carbon Literacy Project
- EcoBarter
- Nigeria Youth SDG Network
- Casa Verde

Organisational Growth

This year, WasteVest focused on strengthening its internal systems by:

- Developing organisational policies
- Improving governance structures
- Expanding strategic partnerships
- Building programme delivery capacity
- Enhancing digital communication and outreach

Our Impact

1. During the reporting period, WasteVest:
2. Expanded access to climate education through Carbon Literacy initiatives.
3. Increased awareness of circular economy practices among youth and community stakeholders.
4. Strengthened relationships with public, private, and civil society partners.
5. Continued developing technology-enabled approaches to sustainable waste management.
6. Positioned the organisation for future programme scale and long-term impact.

Looking Ahead

1

Over the next year, WasteVest aims to:

- Expand Carbon Literacy training across Nigeria.
- Strengthen partnerships with government, academia, and the private sector.
- Scale community recycling and environmental awareness programmes.
- Develop digital solutions that improve waste collection and circular economy participation.
- Create more opportunities for young people through green skills and climate leadership.

2

Governance

WasteVest is committed to transparency, accountability, and responsible organisational management.

The organisation operates under policies covering:

- Safeguarding
- Financial Management
- Ethical Conduct
- Procurement
- Data Protection
- Equal Opportunity

3

Partners

We are grateful for the collaboration and support of:

- The Carbon Literacy Project
- Lighthouse Sustainability
- EcoBarter

4

- Lagos Business School Sustainability Centre
- LEAP Africa
- ACT Foundation
- Nigeria Youth Futures Fund

- Nigeria Youth SDG Network
- Trashformer
- EstyAgro Sciences

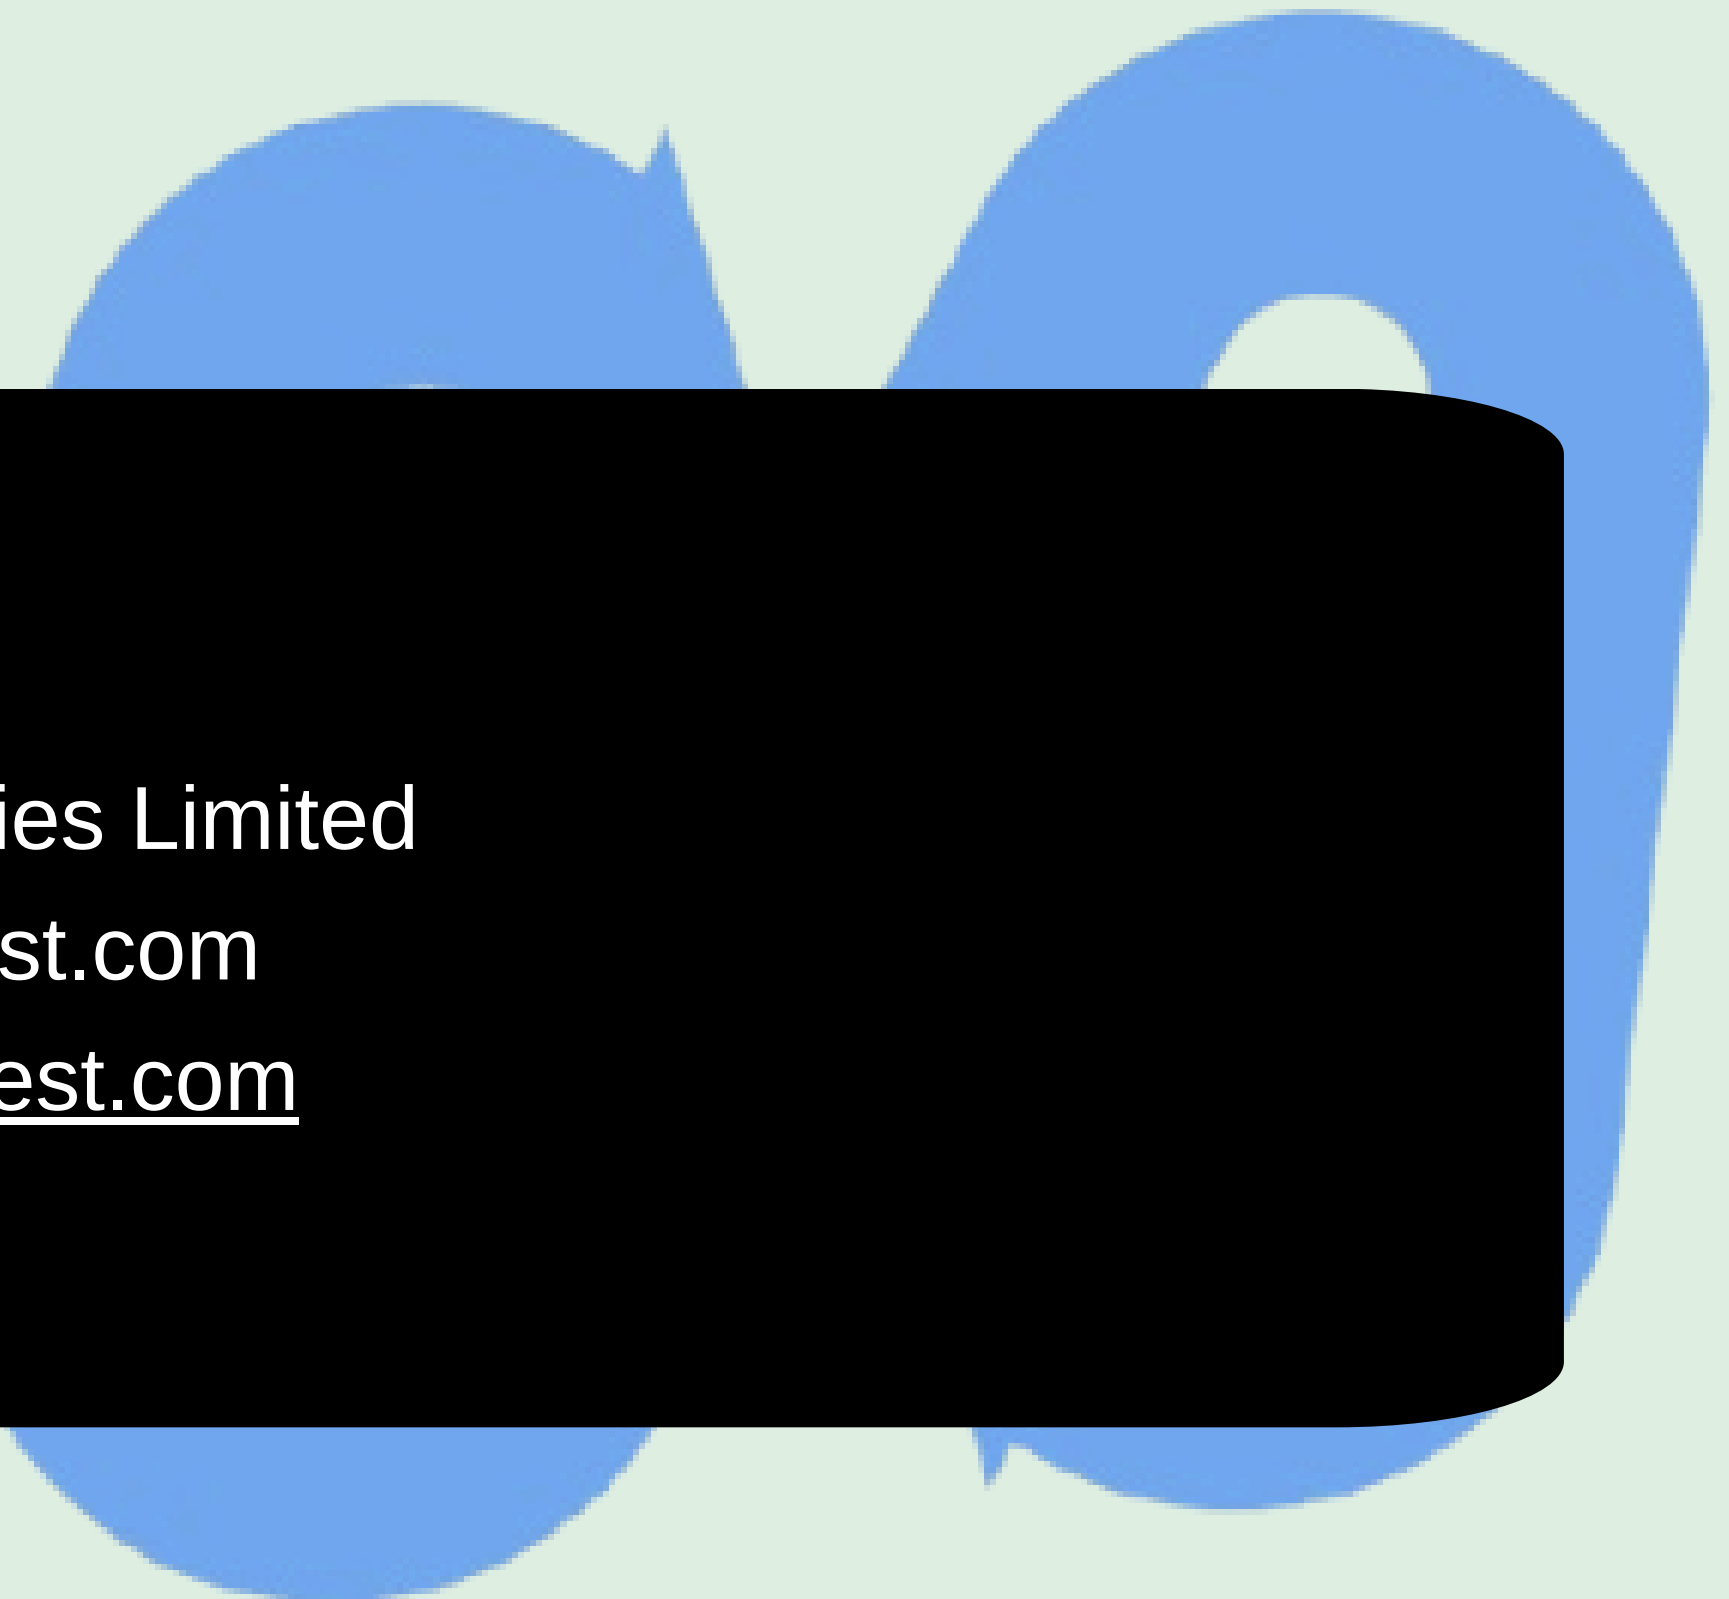

Financial Overview

- As an early-stage social enterprise, WasteVest continued to invest in organisational development, programme design, technology development, and partnership building during the reporting period.
- Funding sources included:
- Organisational grants
- Capacity-building programmes
- Founder contributions
- Strategic partnerships
- The organisation remains committed to sound financial management, transparency, and sustainable growth.

Our Values

- Innovation
- Integrity
- Collaboration
- Inclusion
- Sustainability
- Accountability
